

FRAME REPAIR PLATES

A quick fix that lasts..!

The Frame Repair Plates are designed to provide a quick solution to repair a damaged frame with a mortice lock fitted. They can also be used to increase the security on a newly installed lock where an attack is likely.

Wrapping around the edge of the frame and securing in two planes - face and edge - the Frame Repair Plates easily and quickly repair a door frame without the need to replace it. Saving time and money and quickly making the site secure again in minutes.

Made from stainless steel these repair plates are available to suit a deadlock/mortice nightlatch, UK style sashlocks and DIN sashlocks

All are available in satin stainless steel or a range of finishes such as electro brass plated, any RAL colour or even a wood grain effect to special order.

Contact us on 01270 505902 to discuss your specific requirements
