

FRAME REPAIR PLATES

A quick fix that lasts..!

The Frame Repair Plates are designed to provide a quick solution to repair a damaged frame with a mortice lock fitted. They can also be used to increase the security on a newly installed lock where an attack is likely.

Before...

After...

Now Available for rim nightlatches

Features in brief...

- Replaces damaged striking plates and strengthens the door frame
- Wraps around the edge of the frame and secures in 2 planes for additional strength
- Available to suit rim nightlatch, mortice deadlock, mortice nightlatch or sashlock - both UK & DIN locks
- Custom sizes available to suit specific frame designs and 54mm frames
