PIVOT PROTECTORS

Before...

After...

***“To date the Trust has installed in excess of 400 Pivot Protectors and made savings in the order of £200,000 over a four year period based on the cost to renew the damaged doors”
November 2010***

Head of Projects, Abertawe Bro Morgannwg University Health Board

- Protects against damage, or repairs existing damage, at the pivot point on timber double swinging doors
- Fits over the top and bottom pivot points without compromising pivot function
- Reduces maintenance costs and cost of replacing damaged doors
- Proven to extend the durability of a pivoting timber door
- Fire tested to BSEN1634 at 30 minutes and 60 minutes
- Manufactured in high strength stainless steel for durability
- Allows easy adjustment of fittings such as an automatic closer where used
- Quick and easy to fit saving time and resources; may be retro-fitted to existing doors or pre-fitted to new doors
- As standard in satin stainless steel; available in polished stainless steel, brass, polyester powder-coated finish and RAL colour finish to order
- As standard sized to fit 44mm or 54mm thick timber doors; available in custom sizes to order
- Patented product manufactured in Britain

FLUSH BOLT PROTECTORS

Before...

After...

- Protects against damage, or repairs existing damage, at the flush bolt on a timber door
